ENERGY EFFICIENCY SPECIALIST

Case study: **Bailey & Mackey Ltd**

Sustainability gains & solar investment

Experienced Energy Solutions are pleased to be supporting Birmingham based manufacturer Bailey & Mackey Ltd, on their journey towards sustainability.

Facing unprecedented rising energy costs, the firm were keen to mitigate this and move towards greener business practices and were prepared to make a significant investment for their vision to be realised.

Outcomes for Bailey & Mackey

Carbon
emission
reduction of
23,731kg
a year

**Additional
income stream**
through sale of
excess energy

Pay-back period
of just **four**
years

What we did

EES supported Bailey & Mackey to develop a solar PV and energy storage solution which will ensure its operations are fully powered by renewable energy and, more importantly, make them self-sufficient without the need to draw power from energy suppliers.

EES will purchase all excess energy that is produced through these systems which will generate further income for Bailey & Mackey.

Quotes

"It was great to work with EES to finalise the deal of becoming **more energy efficient** at our existing site. The project sits in line with our strategic plan to develop as a **sustainable** and **forward-thinking** manufacturing firm"

Paul Topham, Bailey & Mackey

"EES are delighted with this success story and take pride that we were able to support Bailey & Mackey to meet their strategic plan to become more **sustainable**, along with navigating them through rising energy costs to become **self sufficient**."
